This project represents a tranquil Master Suite that is all about letting the natural light fill the spaces. With windows and French doors on all four sides of the room, the spaces immediately draw your eyes to embrace the wonderful views of the lake, trees, gardens and wild life that surround this home. I love to bring touches of nature indoors, like the blooming branches on the mantel!

The terrace off of the Master Suite provides a special oasis for this home owner... and maybe a Buddy! It is easy to breathe deeply, relax, and welcome your natural surroundings in while spending time up on this secret garden terrace!
