SENSE *of* PLACE

Geography may not be destiny,
but it certainly influences design.
New books from three DLN
members demonstrate how
location has shaped their vision

Greenwich is a storied area of East Coast privilege and Old-World aristocratic style. And no one is more adept at conjuring visions of the grand life than **CHARLES HILTON ARCHITECTS**. Whether a stately Georgian estate or a sprawling Shingle-Style American seaside manse, each of Hilton's houses is richly imagined, beautifully detailed, and sumptuously fitted out.
